DEPARTMENT OF AGRICULTURE,

VICTORIA, B.C., March 28th, 1919.

To His Honour Sir FRANK STILLMAN BARNARD, K.C.M.G.,

Lieutenant-Governor of the Province of British Columbia.

MAY IT PLEASE YOUR HONOUR:

I have the honour to submit herewith Bulletin No. 82, entitled "Agricultural Statistics, 1918," which has been compiled by A. B. Tweddle, Statistician, Department of Agriculture, under the direction of Mr. W. T. McDonald, Acting Deputy Minister.

I have the honour to be,

Sir,

Your obedient servant,

E. D. BARROW,

Minister of Agriculture.

DEPARTMENT OF AGRICULTURE,

VICTORIA, B.C., March 28th, 1910.

Hon. E. D. Barrow,

Minister of Agriculture, Victoria, B.C.

Sir,—I have the honour to submit herewith for your approval Bulletin No. 82, entitled "Agricultural Statistics, 1918," which has been compiled by A. B. Tweddle, Statistician, Department of Agriculture.

I have the honour to be,

Sir,

Your obedient servant,

W. T. McPHERSON, J.D.,

Acting Deputy Minister.

ACKNOWLEDGMENTS.

Grateful acknowledgments are tendered to the following for valuable co-operation in supplying data contained in this bulletin: Various produce merchants for data relating to imports from other Provinces in Canada; Dominion Express Company and Canadian Northern Express Company for data showing express movements of fruits and vegetables; F. Napier Denison, Superintendent, Meteorological Observatory, British Columbia, for meteorological data; and the Department of Customs, Ottawa, for statements relating to imports from foreign points.

INTRODUCTION.

THIS bulletin contains statistics of the agricultural industries of the Province of British Columbia. These statistics relate to areas of land under crop and under cultivation; production of the various crops; animals, animal products, and climate as affecting agriculture. Included also are statements relating to express movements of fruits and vegetables and imports of all agricultural food products.

The data shown for 1917 and 1918 relating to the areas of field crops and numbers of live stock were determined by means of a postal census in June, taken through the joint efforts of the Dominion and Provincial Governments.

The total number of farmers, or separate farms, in the Province, according to the registration taken in 1918 by the Dominion Registration Board, was 15,146. This total does not include farmers' sons. Of the total farmers, 42.5 per cent. responded to the inquiries sent out. Since it was assumed that the proportion of crop areas and numbers of live stock on farms not reporting would be the same as for those reporting, the total for the Province was determined by adding the difference (57.5 per cent.).

AGRICULTURAL STATISTICS, 1918.

SYNOPSIS OF AGRICULTURAL CONDITIONS IN BRITISH COLUMBIA, APR 1918

Owing to the spring of 1918 being later than average and the scarcity of labour, the volume of agricultural production only slightly exceeded that of the previous year, yet prices realized were such as to result in an increase in the total value of 31.28 per cent. over 1917. The outstanding increases occurred in meats, fruits, and fodders.

Total imports of food products during 1918 show an increase of 10.7 per cent. over the previous year, due to high prices.

Whilst figures are not available showing exports, the total value is estimated to have been \$200,000, consisting chiefly of fruits and vegetables.

FRUITS.

The total production of all fruits in 1918 shows an increase of only 0.7 per cent. over 1917, yet the greatly increased prices realized throughout resulted in a total value 52.00 per cent. greater than 1917 and 331.0 per cent. since 1913. The quantity in the same period shows an increase of 188.5 per cent.

VEGETABLES.

Although the area of potatoes in 1918 was slightly less than the previous year, the total yield was 34.0 per cent. greater, whilst owing to increased prices the total value was 80.2 per cent. greater.

The total area of root-crops was 25.4 per cent., and the total yield 40.2 per cent. greater than in 1917.

A marked increase in the total yield of tomatoes occurred, especially in the Okanagan Valley, and where the average price was \$20 per ton for cannery purposes.

GRAINS.

The total area sown to grains as shown by the June census was 11.3 per cent. greater than in 1917. Owing to unfavourable weather, a larger percentage than usual was cut as hay or green feed, thus reducing the area of threshing grains to slightly below 1917. The total yield of all grains was 33.8 per cent. below 1917, yet the high price realized resulted in the total value being only 14.3 per cent. less.

FODDERS.

The total area of all fodders was 2.2 per cent. lower than 1917. Unfavourable growing conditions also reduced the average yield of clover and timothy, so that the total yield of all fodders was 4.1 per cent. lower than 1917.

Prices were exceedingly high; clover and timothy averaging \$33 and wild hay \$20 as against \$17.50 and \$15 in 1917. The total value of fodders in 1918 was 60.9 per cent. greater than 1917.

LIVE STOCK.

Horses show a decrease in numbers of 19.9 per cent. since 1917, due to large numbers being exported and the increased use of motors in the Province.

Cattle show an increase in total number of 2.5 per cent. over the previous year. Dairy cattle still continue to show an increase in numbers, there being recorded in 1918 4 per cent. more dairy cows than in 1917.

Sheep increased in numbers over 20 per cent. over 1917. Not only were many imported for breeding purposes, but breeders have, as during the previous two or three years, reserved the ewes from the market.

Swine increased in numbers 5.6 per cent. over 1917.

Poultry, owing to the continued high prices of feedstuffs, show a falling-off in numbers of 26.7 per cent. Notwithstanding, the total value of poultry and eggs during the year shows an increase of 10.8 per cent., due to the high prices prevailing.

MEATS.

The total quantity of meats marketed during the year increased 20.8 per cent., whilst the total value was 77.6 per cent. greater. The chief increase was in beef. The total value of meats imported during the year was 30.9 per cent. greater than in 1917.

DAIRY PRODUCTS.

The cold, backward spring and subsequent drought in the Lower Mainland and Vancouver Island sections of the Province had the effect of materially reducing the milk-flow amongst dairy herds. There was a marked increase in the quantity of butter manufactured by creameries.

It is interesting to note the increase in the quantity of cheese manufactured during the year, this being 250,674 lb. as against 43,400 lb. in 1917 and 18,000 lb. in 1916. The total value of all dairy products in 1918 increased 13.1 per cent. over 1917.

Total imports of dairy products during the year increased in value 10.8 per cent. over 1917.

March 28th, 1919.

A. B. TWEDDLE,
Statistician.
